

Please consider keeping the "established business relationship" qualification for fax regulations! Our non-profit assn. would be forced to maintain signatures for all our members, new members, those who have requested our info be sent to them. When they move, we would need to get those signatures all over again, causing much extra expense to very low budget non-profits. The time and money involved in this would be enough to completely eliminate our ability to stay in business. I agree completely with the rules where no existing business relationship exists, but if members join, they should be able to receive our info on events, etc. That is why they join. Thank you for your careful consideration of the negative impact this will have on non-profit associations in the community and in the business world.
